

KEY HIGHLIGHTS

Learning Theories: A Practical Introduction

Resource person: Jack | Presenter for Team Satchel | Curated from Team Satchel
Learning Theories: A Practical Introduction | Learning Theories | pedagogy

- 01 00:30 — Pedagogy covers the theory, method and philosophy behind teaching choices.
- 02 01:31 — Behaviourism directs attention to observable performance, repetition, reinforcement and prompt feedback.
- 03 03:34 — Paulo Freire's work introduces dialogue, learner agency and a critique of treating students as containers for information.
- 04 05:17 — Social constructivism treats explanation and joint problem-solving as part of the learning process.
- 05 06:36 — Connectivism asks how learners navigate people, tools and information networks in a digital environment.
- 06 08:02 — The four lenses overlap, so teachers still need to choose and evaluate an approach for a specific purpose.
