Use and Misuse of AI in Education | Emerging EdTech Trends | technology

01

Curriculum should preserve the foundations students need to judge a tool's output.

02

AI responses require checks for accuracy, relevance, evidence and consequences.

03

Debate rehearsal can help students expose weak points before a live defence.

04

AI literacy includes capabilities, limitations, ethics, privacy and trustworthy use.

05

Oral defence and applied reasoning make student understanding easier to observe.

06

AI can support editing, accessibility and routine preparation when a teacher reviews the result.
